

Questions for 3.8.24 Task Force Discussion:

- *We have heard presentations on many topics involved with aging in Minnesota, and we still have more to hear. From what we have heard so far, what directions and opportunities should we start to consider when thinking of our recommendations to the Legislature?*

- *The reality of healthy aging and aging in community in Minnesota is that it is not one thing, it is outcome of many factors. What should we start to consider for promoting how all these factors can improve healthy aging?*
 - i. *Social Determinants of Health/Aging (according to the CDC)*
 1. *Economic stability*
 2. *Social and community environment*
 3. *Education access*
 4. *Health care access and quality*
 5. *Neighborhood and built environment*

- *We've heard many experiences members of the public have had aging in Minnesota, touching on things like social programs, broadband equity, clearing snow and ice from sidewalks, and more. What thoughts do we have to address these wide-ranging impacts on healthy aging and aging in community?*
