Subject: Essential workers bonus pay

I believe that Minnesota should not be setting a cap on the salary an individual makes in order to receive the bonus pay! Most ICU nurses and doctors make more than that and also received over time as there were many under staffed hospitals that needed the nurses to stay longer! Also, the pay should not be just for those employees still working in the profession. Many, many left the jobs especially them ICU, Hospital nurses aides that had to touch everything! They endeared a lot of stress from all as they had to do what the doctors or nurses told them. I believe many left the jobs because they simply were worn out and didn't receive extra pay for going above and beyond. We need them people back so lets thank them for what they did do while employed at these facilities! Please relook at our proposed plan for essential workers and give to the right people!
