Subject: Grocery Store Workers

We kept the country running with limited to no protection, reactionary and lethargic administration within our stores, a failed government that refused and continues to refuse to keep people home, all to serve a general public that despises us, looks down on us, and actively refuses to participate in protective measures. I write this to you from home as I have Covid despite being vaccinated because the general public doesn't care about curbing the Delta Variant. It's bad enough that we're paid minimum wage; but add on top of that having to deal with the worst of humanity 40 hours a week, and it's definitely a job deserving of financial reward. Please do not exclude grocery store and food service workers from your financial support.
