

Minnesota Background Studies 2018-2019 Data Overview Part 2

The information above each section of tables is intended to provide context and understanding on what data is included in each respective section. There are [Additional Notes and Data Definitions](#) at the end of this packet with more information on specific terms and data points. The tables start at a high level and then progress into more detail in each section as data is disaggregated further.

Section 1: Count of disqualified determinations and persons by race/ethnicity, year and gender

[Section 1](#) includes the total counts of distinct determinations and persons with determination that is disqualifying or that had their disqualification rescinded and is now eligible by race/ethnicity and year. In the Data Overview Part 1, determinations were broken out by eligible and disqualifying. The determinations with their disqualification rescinded and now eligible were part of the eligible count in the last overview. These determinations have been included in this overview as they originally had a disqualification and therefore had a risk of harm assessed. The distinct counts of determinations in [Table 1](#) and [Table 1a](#) and the distinct count of persons in [Table 2](#) and [Table 2a](#) represent all determinations that received a risk of harm assessment, which will be broken out in [Section 3](#) and [Section 4](#). The charts and tables in Section 2, Section 3, and Section 4 are all based on this same “universe” of determinations that are disqualifying or that had their disqualification rescinded and are now eligible.

All counts throughout this document are distinct counts, meaning they represent the unique number of determinations or persons in each given category. For example, when counting distinct persons, it is important to recognize that a person can have multiple determinations and those determinations can have different results. Therefore, one person could be counted in the “disqualified” category and the “disqualification rescinded – determination now eligible” category. Similarly, a person can have one or more determinations in multiple years, which means the totals for 2018 and 2019 in [Table 2](#) do not add up to the Grand Total. For example, if one person has a determination completed in 2018 and a determination completed in 2019, they will be counted in both the 2018 and 2019 rows, but will only be counted once in the Grand Total of distinct persons. All counts for a given date range (year in this case) were defined by determinations completed in that year. This date convention is used in all sections.

[Table 1](#) and [Table 2](#) below provide distinct counts of determinations and persons respectively. [Table 1a](#) and [Table 2a](#) provide the same counts, but break them out further by gender.

Table 1: Distinct count of disqualified and disqualification rescinded – determination now eligible by race/ethnicity and year

Year/Determination Outcome	African American	Asian or Pacific Islander	Native American	None Provided	Unknown/Other	White	Grand Total
2018	2,686	153	419	32	590	3,774	7,654
Disqualifying	2,669	152	418	32	586	3,744	7,601
Disqualification Rescinded - Determination Now Eligible	17	<10	<10		<10	30	53
2019	4,907	281	619	258	1,041	5,851	12,957
Disqualifying	4,886	279	615	258	1,034	5,811	12,883
Disqualification Rescinded - Determination Now Eligible	21	<10	<10		<10	40	74
Grand Total	7,593	434	1,038	290	1,631	9,625	20,611

Table 1a: Distinct count of disqualified and disqualification rescinded – determination now eligible by race/ethnicity, year and gender

Year/Determination Outcome	African American	Asian or Pacific Islander	Native American	None Provided	Unknown/Other	White	Grand Total
2018	2,686	153	419	32	590	3,774	7,654
Disqualifying	2,669	152	418	32	586	3,744	7,601

Grand Total	4,352	306	703	272	1,102	6,258	12,993

Section 2: Number of Disqualifying Crimes and Conduct per Determination

The risk of harm assessed for a disqualifying determination is based, in part, on the “the number of disqualifying characteristics” ([Minn. Stat. sec. 245C.16 subd. 1](#)) which are captured as disqualifying crimes and conduct in the background studies database. [Chart 1](#) below provides a distribution of the number of disqualifying crimes and conduct for each disqualifying determination completed in 2018 and 2019. The chart shows, for example, that 13,790 determinations had one disqualifying crime or conduct and 119 determinations had 10 or more disqualifying crimes and conduct. The number of crimes and conduct on each determination plays a role in both the complexity of the determination and the risk of harm assessed for the determination.

Chart 1: Count of disqualifying or disqualification rescinded – determination now eligible determination determinations by number of disqualifying crimes and conduct, 2018-2019

Section 3: Disqualified Individuals Risk of Harm

If a determination is disqualifying, the Department of Human Services is required to assess the immediate risk of harm the determination subject poses to the persons receiving services that the subject will have direct contact with or direct access to. [Minn. Stat. sec. 245C.16](#) lays out the factors that must be used in the risk of harm assessment. The risk of harm assessment can have three outcomes, which are captured in the background studies database as low, medium, and high:

- **Low:** It is determined that “an individual studied does not pose a risk of harm that requires continuous, direct supervision”. A low risk of harm individual is allowed to continue providing services during their reconsideration request period and has 15 days to request a reconsideration. ([Minn. Stat. sec. 245C.17 subd. 3](#))
- **Medium:** It is determined that “an individual studied poses a risk of harm that requires continuous, direct supervision”. A medium risk of harm individual is allowed to continue providing services under continuous and direct supervision during their reconsideration request period and has 30 days to request a reconsideration. ([Minn. Stat. sec. 245C.17 subd. 3](#))
- **High:** It is determined that “an individual studied poses an imminent risk of harm”. A high risk of harm individual must be immediately removed from service and has 30 days to request a reconsideration. ([Minn. Stat. sec. 245C.17 subd. 3](#))

In cases where an individual is not allowed to provide services until either an eligible determination, a set aside, or a variance has been obtained, the risk of harm is not applicable because an individual with a disqualifying determination cannot provide services regardless of their risk of harm unless a set aside or variance is obtained. Table 3, breaks out the total count of distinct persons in [Table 2](#) by the risk of harm assessed in their determination.

[Table 3](#) also breaks out each risk of harm category into determinations and Rapback (Record of Arrest and Prosecutions Back) determinations. As compared to determinations made based on provider applications, Rapback determinations are based on notifications DHS receives about new potentially disqualifying information for a background study subject with an active provider roster affiliation. Since one of the risk of harm factors laid out in [Minn. Stat. sec. 245C.16](#) is the recency of disqualifying characteristics, a Rapback determination is more likely to have a higher risk of harm than a comparable non-Rapback determination because its disqualifying characteristics are likely to be more recent.

[Table 3a](#) provides the same data in [Table 3](#), but further broken out by gender.

Table 3: Distinct count of persons with at least one disqualified or disqualification rescinded – determination now eligible determination by race/ethnicity, risk of harm and year

Year/Risk of Harm/Determination Type	African American	Asian or Pacific Islander	Native American	None Provided	Unknown/Other	White	Grand Total

Section 4: Distinct count of persons and determinations by race, year, provider types, and regulatory agency

This section represents the same data shown in the tables in [Section 3](#), but is further disaggregated by regulatory agency and provider type. Since there are many provider types in this final breakdown, the data has been separated into 5 tables to show counts for each risk of harm category. [Table 4](#) provides counts for all risk of harm categories combined, [Table 5](#) provides counts for low risk of harm, [Table 6](#) provides counts for medium risk of harm, [Table 7](#) provides counts for high risk of harm, and [Table 8](#) provides counts for not applicable risk of harm. Since one person may have multiple determinations, and each determination may be associated with multiple applications from different providers who are monitored by different regulatory agencies, the sum of distinct counts of persons associated with each regulatory agency will not equal the Year Total or the Grand Total in the tables below.

As compared to the final tables in the Data Overview Part 1 where all Rapback studies were broken out in their own category, each provider type in the tables below has both a determinations and rapback determinations count.

The same notes on why distinct counts within each row do not add up to Year Totals and Grand Totals apply to these tables. Also, determinations can be tied to provider applications that were received after the determination was made. There are some provider types represented in the tables below that did not exist in 2018 or 2019. However, provider applications may have been received after 2018 or 2019 and subsequently tied to existing determinations that were completed in 2018 or 2019 and the distinct persons associated with those studies. Breaking out these data by provider types creates many rows, so [Table 4](#), [Table 5](#), [Table 6](#), [Table 7](#), and [Table 8](#) are each split between two pages for better readability.

To provide data in table 4-8 by gender as well, an “a” and “b” table have been added after each table to show data for just males and just females. For example, the data in Table 4a provides the data in Table 4 for only males and the data in Table 4b provides the data for only females.

For this overview, gender data was included after the original overview was created. In sections 1-3 gender data was added to the snapshot of data as it existed when the original overview was created, which means all of the counts stayed the same and new breakouts by gender were added. In order to generate the tables in Section 4 with breakouts by gender, it was necessary to re-generate data from the database as there was no static snapshot to which the gender data could be added. Since data in the database is subject to change minute by minute as information is updated and new information is added, data generated at different times only reflects the data as it existed at the time. As a result, some of the totals in the gender tables below may be slightly different compared to tables above as the data was generated on different dates.

Table 4: Distinct count of persons by race/ethnicity, year, regulatory agency, provider type, and determination type. All risk of harm categories included.

Additional Notes and Data Definitions

1. Background Study **data sources** can include, but are not limited to, state criminal history, federal criminal history, Minnesota Court Information System (MNCIS), Minnesota child and adult maltreatment registries, and the Child Abuse and Neglect Registry (CANR).
2. An **eligible determination** means the background study subject was **not** determined to have committed a disqualifying crime or conduct in [Minn. Stat. sec. 245C.15](#)
3. A **disqualified determination** means the background study subject was determined responsible for a disqualifying crime or conduct in [Minn. Stat. sec. 245C.15](#)
4. A **disqualification rescinded – determination now eligible** determination means the initial determination was disqualifying and became eligible upon appeal.
5. A **background study provider application** is the record created by the provider when submitting a background study request. Background study provider applications can be created by providers at any time. If there is already another background study determination in process for the same person, the new background study application will connect to the in process background study determination (provided the background study requirements are met). In addition, existing background study determinations can transfer to new background study provider application submissions. The connection of background study provider applications to existing background study determinations creates efficiencies for study subjects and providers.
6. For an **undetermined determination**, DHS reviews information that was received but does not make an eligibility or disqualification decision on the determination (hence the determination is “undetermined”).
7. **Active roster** means the list of individuals specific to an entity who have been determined eligible to provide services for the entity and who the entity has identified as affiliated. See [Minn. Stat. sec. 245C.02 subd. 17a \(b\)](#)
8. A **rapback notification** (Record of Arrest and Prosecutions Back) is a notification DHS receives about new potentially disqualifying information for a background study subject with an active provider roster affiliation.
9. An **eligible rapback determination** means that the information received through the Rapback process was found to belong to the study subject, but after review was determined to not be a disqualifying crime or conduct.
10. The Race/Ethnicity categories captured in the Background Studies system and used in the summarized data above are collected for purposes of a background study fingerprint study. These categories are determined by the FBI CJIS policy and must be used for fingerprint background studies. DHS does not collect other race/ethnicity data that would allow for different or more detailed break outs of racial or ethnic groups.
11. **Risk of Harm** is the assessed immediate risk of harm the determination subject poses to the persons receiving services that the subject will have direct contact with or direct access to. For the purposes of this data set, risk of harm only refers to the person’s ability to work while the reconsideration period is pending. The term risk of harm in this data set is distinct from risk of harm for purposes of a set aside, which requires a different statutory analysis captured under Minn. Stat. sec. 245C.22 and determines whether a person will be formally “set aside” and allowed to work for a program without supervision.
 - a. **Low:** It is determined that “an individual studied does not pose a risk of harm that requires continuous, direct supervision”. A low risk of harm individual is allowed to continue providing services during their reconsideration request period and has 15 days to request a reconsideration. ([Minn. Stat. sec. 245C.17 subd. 3](#))
 - b. **Medium:** It is determined that “an individual studied poses a risk of harm that requires continuous, direct supervision”. A medium risk of harm individual is allowed to continue providing services under continuous and direct supervision during their reconsideration request period and has 30 days to request a reconsideration. ([Minn. Stat. sec. 245C.17 subd. 3](#))
 - c. **High:** It is determined that “an individual studied poses an imminent risk of harm”. A high risk of harm individual must be immediately removed from service and has 30 days to request a reconsideration. ([Minn. Stat. sec. 245C.17 subd. 3](#))

- d. **Not Applicable:** The risk of harm category in cases where an individual is not allowed to provide services until either an eligible determination, a set aside, or a variance has been obtained
