Disqualifying Crimes in 2018-2019, Broken Down by Suggested Categories

Data from DHS Dataset 3, Table 6

Explanatory Note
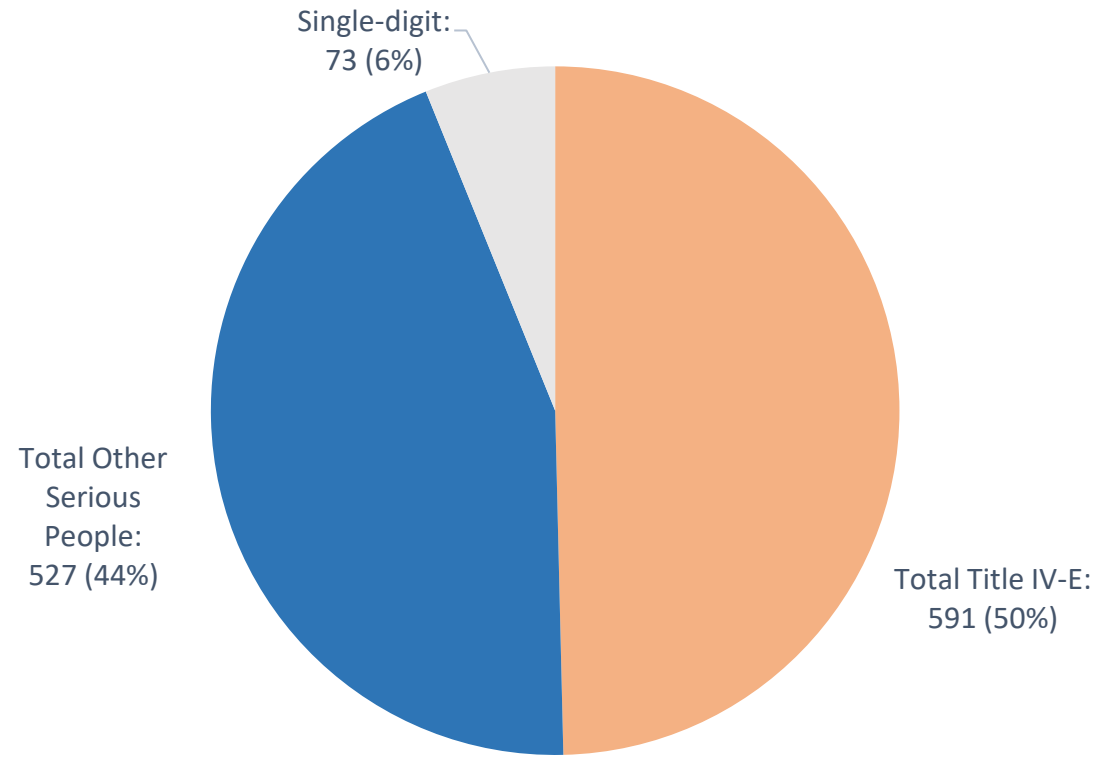

- The DHS dataset reported single-digit numbers as "<10" to preserve individuals' privacy.

- Because exact single-digit figures are not known, they are reported as a separate "category" rather than being included in the actual categories of crimes to which these figures should ideally belong.

- This "category" of single-digit numbers reported on these charts is, however, relatively small, representing a relatively small error in these charts.
