Telling the Story with Data: Next Steps, Considerations, and Questions

- How do these data align with other data sources (e.g., workforce shortages)?
- Why do we see a higher percentage of disqualifications in certain provider types?
- Why do we see greater race/ethnicity disparities in disqualifications in certain provider types?
- Who can provide additional sources of data to help answer these questions?
- Are we displaying the right data?
- What additional ways might we analyze the data?
- What ways can we better display the data for consumers of the data?
