The Minnesota State Colleges and Universities (MnSCU) system is the largest single provider of higher education in the state of Minnesota and the fifth largest system of colleges and universities in the United States. The system includes 31 institutions (24 technical and community colleges and seven state universities) spanning 54 campuses serving more than 435,000 students annually.

MnSCU colleges and universities offer 470 programs and 16,400 courses partially or fully online with quality instruction in high-demand healthcare programs such as nursing, health services, medical technology, etc. MnSCU offers associate degree, bachelor's degree and advanced degree options structured to meet workforce needs across the state.

According to the Department of Employment and Economic Development (DEED), healthcare professions make up three of the top ten occupations in demand in Minnesota. Registered nurses top the list with an average annual salary of $58,000. Personal Care Aids rank number eight at $21,000/year, and Licensed Practical Nurses are the tenth most in-demand occupation with an expected annual salary of $36,000. The top projected labor market growth areas for 2009 to 2019 are in the health field, which include personalized and home care aides and RNs. Together, they are projected to create some 51,000 new jobs over the given time period.

For a complete list of programs, visit www.mnscu.edu.
