AUTHORITY AND MISSION

For nearly 50 years the Metropolitan Council has played a key role in coordinating regional growth and planning, providing essential services such as transit and wastewater treatment, and convening partners to accomplish ambitious goals unrealistic for a single community, but possible as a region.

In 1967, the Minnesota Legislature gave us our regional jurisdiction and responsibility. Today, the Twin Cities metropolitan area is a thriving region of nearly three million people living in 186 communities across the seven counties of Anoka, Carver, Dakota, Hennepin, Ramsey, Scott, and Washington. The region has emerged as a world-class metropolitan area – a great place to live, work, and do business.

The metro area is home to 16 Fortune 500 companies and several of the largest private companies in U.S. While our metro area population makes up about 1% of the U.S. total, it accounts for 1.35% of the nation's gross domestic product.

Our governing board has 17 members who are appointed by the governor. Sixteen members represent geographic districts of roughly equal population across the region. The Council chair, the 17th member, serves at large.

The state's Legislative Commission on Metropolitan Government reviews and provides feedback on the Council's operating and capital budgets including the capital program.

STRATEGIC VISION

Thrive MSP 2040 is the region's strategic vision for growth and development for the Twin Cities metro area over the next decades. *Thrive* identifies five key outcomes: Stewardship, Prosperity, Equity, Livability, and Sustainability.

During 2014 and 2015, the Council adopted Policy Plans for Transportation, Housing, Water Resources and Regional Parks that further define the Council's strategic vision. The Council prepared the proposed 2016 Unified Budget, both Operating and Capital components, with these outcomes as guidance.

STEWARDSHIP

Stewardship advances the Council's longstanding mission of orderly and economic development by responsibly managing our

region's natural and financial resources and making strategic investments.

- The Council's 2016 Capital Program places a major emphasis on maintaining existing regional transit, wastewater and parks infrastructure. In addition, the Transportation Division ensures through its plan reviews that resources are directed to the maintenance of regional highway and airport infrastructure.
- The Transportation Division, in identifying where to expand transit service and where to place transit facilities, prioritizes transit investments in areas where development patterns support successful transit.

- The Environmental Services Division protects the region’s water resources through cost-effective wastewater treatment, assessment of water quality of lakes, rivers and streams, assessment of groundwater aquifers and the provision of technical assistance to local governments on storm water management. Environment Services continues near-perfect compliance with federal and state clean water standards.
- The Community Development Division funds the acquisition and protection of priority natural resource areas through its Regional Parks Capital Program. Through its Livable Communities Demonstration Account grants, the Division funds development and redevelopment projects that demonstrate efficient and cost-effective use of land and infrastructure.

PROSPERITY

Prosperity is fostered by investments in infrastructure and amenities that strengthen regional economic competitiveness.

- The Council makes major investments across the region to maintain and improve our economic competitiveness. Investments in transit facilities increase regional mobility. Through its transportation planning, the Council helps ensure that the region will have adequate highway, airport and freight capacity to move people and goods.
- Cost-effective wastewater treatment is a key component in maintaining economic competitiveness. The Environmental Services Division collects and treats wastewater at rates 40% below the average for similar-sized utilities around the country. The Division is also working with local governments to help ensure a sustainable water supply for the region.
- The Community Development Division funds the clean-up of polluted land to support redevelopment, tax-base revitalization, and job creation. The Division also has a new initiative to support local governments addressing economic competitiveness in their local comprehensive plans.

EQUITY

Equity connects all our residents to opportunity and creates viable housing, transportation and recreation options.

- The Council is committed to using its investment decisions to build a more equitable region, investing in a mix of housing affordability along transit corridors, and creating real choices for all residents in housing, transportation and recreation.
- The Community Development Division funds the development of affordable and mixed-income housing and works with local governments to ensure that local comprehensive plans provide an adequate supply of land to meet each community’s share of need for housing for low- and moderate-income households. The Division is also focusing on ensuring equitable access to regional parks and trails.

The Transportation Division conducts federally mandated reviews (Title VI Service Equity, Environmental Justice) to ensure that transit services are provided equitably throughout the region.

- To engage a full cross section of the regional community in regional decision-making, the Council is expanding its public engagement.

LIVABILITY

Livability focuses on the quality of life of our region’s residents.

- Strategies to maintain and improve the quality of life of our residents include providing housing and transportation choices for the full range of demographic characteristics and economic means, increasing access to regional parks and trails, supporting transit-oriented development and walkable places and supporting bicycle infra-structure.
- Community Development uses the Livable Communities Act resources to promote transit-oriented development and compact, mixed use development that links housing,

jobs, and services. The division uses the Regional Parks capital program to expand regional parks and trails which contribute to the livability of the region. The division also encourages communities to plan for a variety of housing options in their local comprehensive plans.

- The Transportation Division is making significant investments in transit to expand travel options for residents, and is identifying regionally important bicycle corridors and ways to improve local connections among them.

SUSTAINABILITY

Sustainability means protecting our regional vitality for generations to come by preserving our capacity to maintain and support our region's well-being and productivity over the long term.

- A key component of the Council's sustainability efforts involves operating

wastewater treatment and transit systems in ways that conserve resources.

Environmental Services helps ensure sustainability by operating its wastewater treatment facilities efficiently, reducing energy use and investing in renewable energy. The Transportation Division is committed to adopting technological advances in the transit fleet to reduce fuel consumption.

- The Council, through its planning and operations, implements efficient water use and conservation, encourages compact and pedestrian-friendly development patterns, promotes alternatives to single-occupancy vehicle travel, and protects agricultural land for local food production and processing.
- The Community Development Division supports local governments that want to address climate change mitigation in their local comprehensive plans.

SERVICES WE PROVIDE

The Council's essential services enhance the region's quality of life and economic competitiveness. We:

- Operate Metro Transit, Metro Mobility, and other contracted routes with energy-efficient fleets. These transit operations served 89 million passengers in 2014. Our strategic investments support a growing network of bus and rail transitways and transit-oriented development.
- Collect and treat wastewater at rates 40% lower than peer regions around the country, while winning national awards for excellence.
- Work to ensure adequate clean water for the future through our water supply planning and coordination and our lake and river monitoring programs.
- Plan for future growth in partnership with communities and the public.
- Plan, acquire and develop an already world-class regional parks and trails system in partnership with local park implementing agencies.
- Provide affordable housing for qualifying low-income residents.

BUDGET PROCESS

Each year the Council prepares an operating and capital budget. The operating budget shows expenditures to support the Council's operations, such as employee salaries, debt service (payments on borrowed money), and funds that the Council "passes through" to others in the form of grants and loans.

The capital budget shows expenditures that involve major capital assets, such as building light-rail transitways, improvements to wastewater treatment plants, and funds to purchase land for regional parks.

Both budgets indicate the funding sources to pay for the expenses, and together, they make up the Council's 2016 Unified Budget.

The Council is committed to the good stewardship of public resources as it carries out its mission. The Council's 2016 Unified Budget fulfills that commitment.

REVIEWING AND DEVELOPING THE BUDGET

January - June

The Regional Administrator meets with division managers to build a proposed budget that meets guidance from the Council.

A "big picture" budget overview is presented to the Council.

July - August

The Council's standing committees review and refine the divisions' budget proposals, priorities, and funding options. Division budget proposals are presented to the Council.

The Council is required to adopt a preliminary operating budget and property tax levy by September 1 of each calendar year.

August - November

The Council's standing committees review the proposed capital program. The capital program is a six-year plan and includes projects such as replacement of fleet vehicles (buses and trains), park improvements and land acquisition, and wastewater system infrastructure.

The Council approves the Unified Budget for public comment.

RECEIVING PUBLIC COMMENT

November - December

The Council is open to receive public comments on its proposed budget until final adoption at the Council meeting on December 9, 2015.

"Truth in Taxation" notices are mailed by metro area counties to property owners showing the proposed amount of property tax that they will be required to pay during the coming year from all taxing jurisdictions. These notices also indicate the date the Council will hold its public meeting to consider and adopt its final budget and levies.

ADOPTING THE BUDGET

At its meeting on December 9, 2015, the Council will adopt a final budget that reflects any changes made to the public comment draft budget. The property tax levy adopted with the preliminary operating budget in August may be lowered, but not increased, when the final budget is adopted.

GETTING INVOLVED IN THE PROCESS

Go to metro council.org to:

- Review *Thrive MSP 2040*.
- See our resources and reports on topics such as transit, housing, land use, parks, and environmental issues.
- Check out Council news for information on regional issues.
- Watch videos of Council and committee meetings to learn about regional issues and services.

Contact your Council member

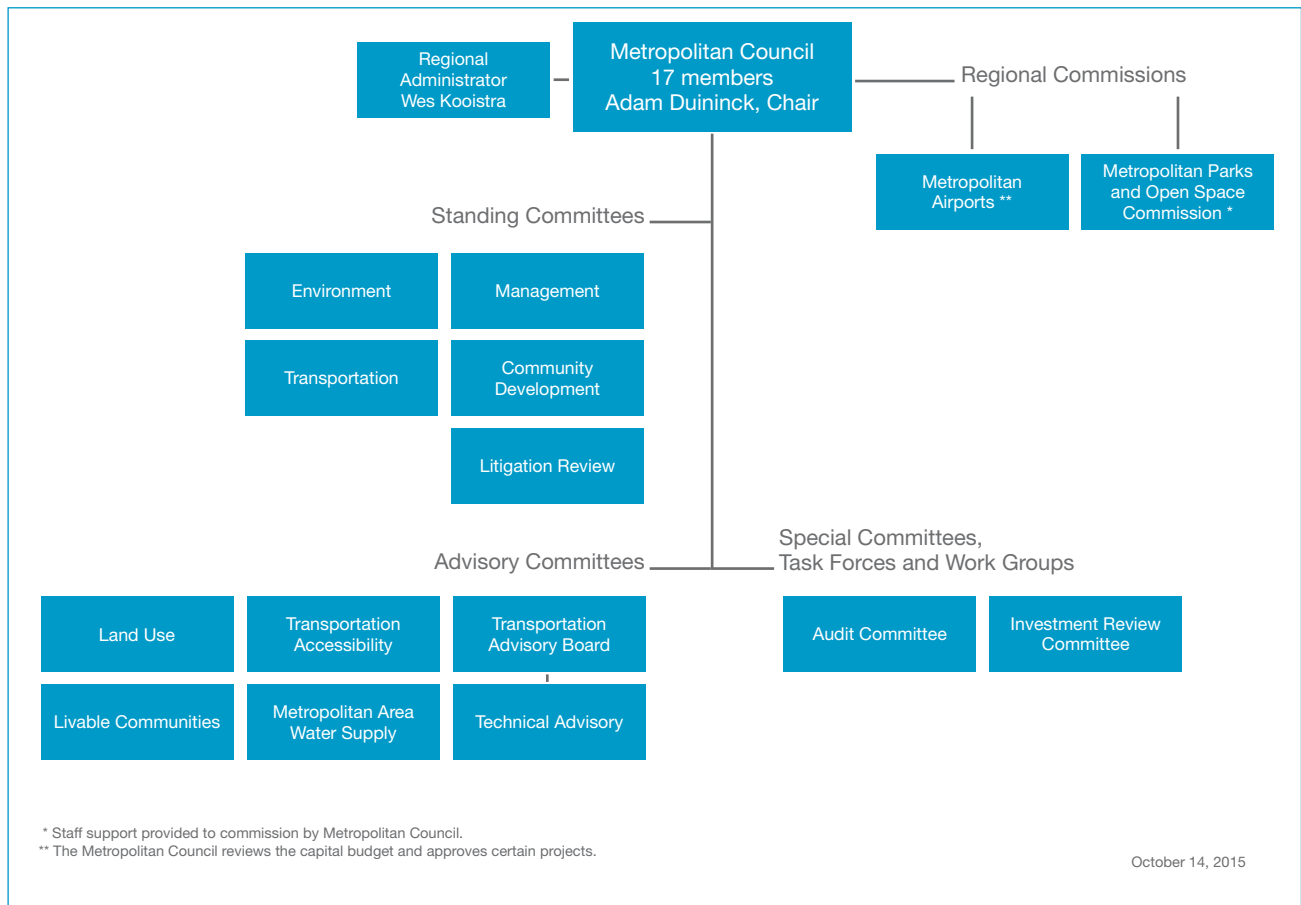

Council members welcome citizen comments and suggestions. Contact your Council member to share your opinions or concerns. A phone call, letter or email message can make a difference.

Go to the Council website to find your Council Members contact information (metro council.org/CouncilMembers).

HOW TO COMMENT ON THE BUDGET

- Attend the Council meeting on December 9, 2015, and provide your remarks during the comment period, beginning at 6 p.m.
- Write to Metropolitan Council Public Information at 390 Robert St. N., Saint Paul, MN 55101.
- Email Metropolitan Council Public Information at public.info@metc.state.mn.us.
- Record a comment on the Public Comment Line at 651.602.1500 (TTY 651.291.0904).

POLICYMAKING STRUCTURE

ORGANIZATION OVERVIEW

The Metropolitan Council organization consists of three operating divisions and supporting central administrative units (Regional Administration). The operating divisions report to the Regional Administrator who, in turn, reports to the 17-member Council. The Regional Administrator is responsible to ensure that priorities and policy decisions of the Council are carried out.

The Council's policy making and organization structure are shown on pages 6 & 8.

REGIONAL ADMINISTRATION

Regional Administration includes Council leadership and centralized administrative services that support the operating divisions. Services provided by Regional Administration include Information Services, Human Resources, Government Affairs, Communications, Legal, Risk Management, Program Evaluation and Audit, Procurement, Diversity and Equal Opportunity, and Finance and Budget.

The majority of the Regional Administration budget is allocated to the operating divisions.

ENVIRONMENTAL SERVICES

Clean water and a clean environment are essential to a healthy life, and the Council is committed to both. The Council's Environmental Services Division (MCES) is nationally renowned for its superior work treating wastewater, monitoring water quality, and planning to ensure a long-range water supply to meet future demand.

MCES provides high-quality, cost-efficient service that protects public health and the environment. MCES consistently receives near-perfect compliance with federal and state water discharge standards while holding rates well below the national average for similar-sized systems.

The capital program for Environmental Services includes funding to preserve wastewater facilities by rehabilitating or replacing existing treatment plant and sewer facilities and equipment. A majority of the capital program is focused on preservation activities.

TRANSPORTATION

Transportation planning and regional transit play an essential role in the regional economy. Transit gets people to jobs and school, eases traffic congestion, improves air quality, saves commuters money, and reduces carbon emissions.

The Council's 2016 budget for Transportation preserves existing service in the region and meets increasing demands for Metro Mobility services.

Capital investments in Transportation include the preservation of the vehicle fleet, customer facilities, support facilities, technology improvements and rail projects. The capital plan also supports transitway development through completion of the Green Line Extension light rail (Southwest Corridor) and the Blue Line Extension light rail (Bottineau).

COMMUNITY DEVELOPMENT

The Council develops the regional comprehensive development plan that helps guide the future growth of the region. The current plan is *Thrive MSP 2040*.

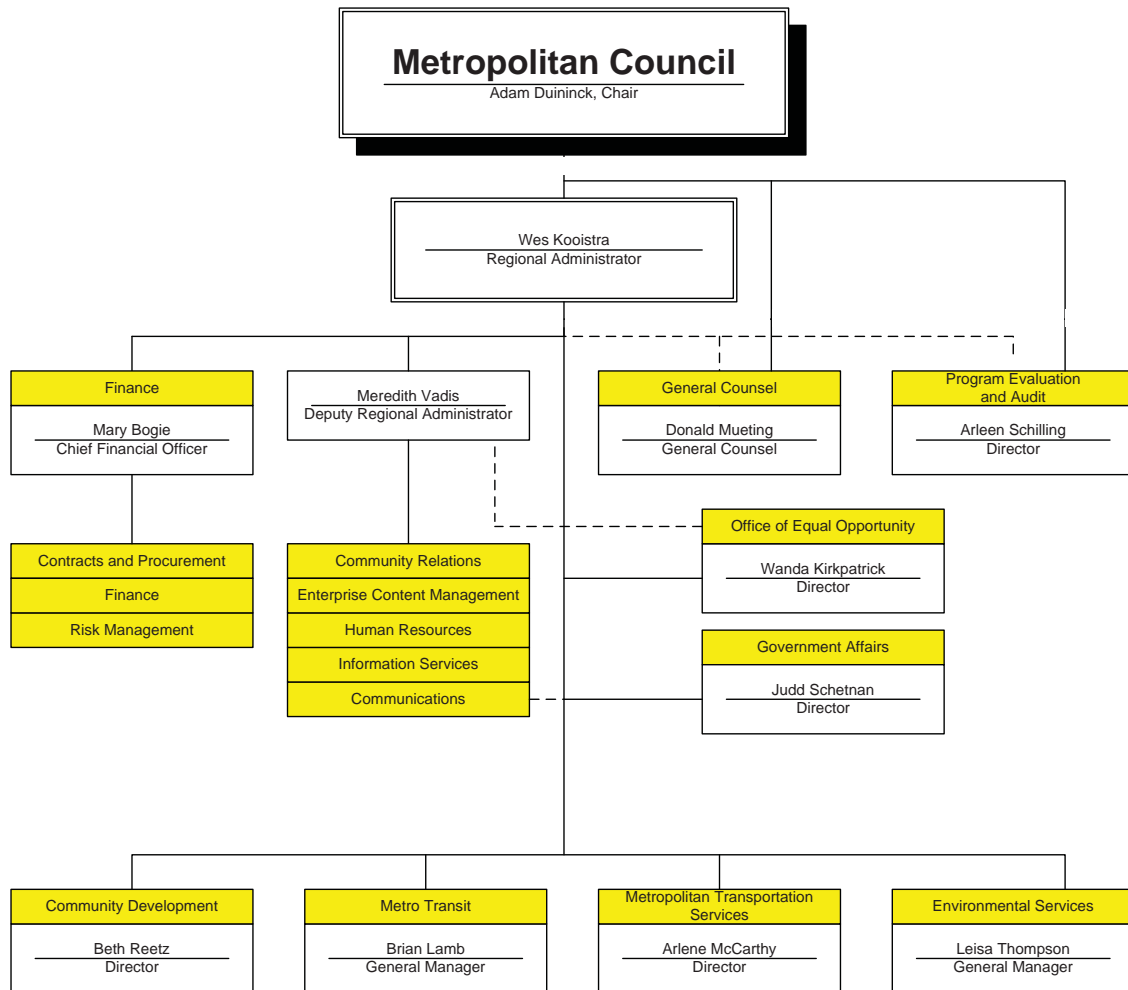

In addition to regional planning, the Community Development operating budget includes funding for the following programs:

- The Metropolitan Housing and Redevelopment Authority (Metro HRA) serves nearly 6,800 families monthly through rental assistance.
- The Livable Communities program provides funding for communities to invest in local economic revitalization, affordable

housing initiatives, and development or redevelopment that connects various land uses to transportation.

- The Parks and Open Space program supports a regional system of parks and trails by making capital grants to 10 regional park implementing agencies. These grants support the acquisition of land, park improvements, and rehabilitation. State funds are also passed through to the regional park implementing agencies to support operations and maintenance of the regional parks system.

ORGANIZATION CHART

2016 OPERATING BUDGET

The Metropolitan Council budget for operations, pass-through programs, and debt service (loan repayments) is \$985 million in 2016.

2016 Operating Budget
Uses by Function: \$985 Million

HOW THE COUNCIL IS FUNDED

2016 Operating Budget –
Sources of Funds: \$985 Million

CHARGES FOR SERVICES

More than one-third of our funding comes from services that customers pay for. Our primary “paying” customers are transit riders and local municipalities.

Transit Fares

Regional transit ridership is projected to top 100 million rides and travel over 50 million miles in 2016. For transit, the ratio of fare revenue to cost varies across types of service. For example, light rail transit fares pay for 35-40% of operating costs; regular-route bus service fares pay for 28-33%; and ADA services

(Metro Mobility) fares pay for a much smaller percentage, at 10-12% of costs. The Council may consider budget-neutral changes to its fare policy during 2016.

Wastewater Charges

On a typical day, Environmental Services Division collects 250 million gallons of wastewater from thousands of miles of pipes in the region.

The wastewater is cleaned at one of eight regional treatment plants and returned to our rivers and groundwater. The treated water is cleaner than existing water in the river. Our wastewater treatment plants are among the highest performing in the nation and annually receive recognition from the National Association of Clean Water Agencies.

The 2016 budget includes an adopted increase in the metropolitan wastewater charge of 5.4%. With this increase, the average metro household will pay approximately \$21 a month in retail sewer charges. Included in the monthly charge of approximately \$12 is the Council’s wastewater charge and \$9 is the local charge. The sewer availability charge imposed on development will not increase for 2016.

STATE REVENUES

The Council receives revenue from the State of Minnesota, primarily from motor vehicle sales taxes for transit (MVST - \$279 million), state general fund appropriations for transit (\$77 million) and parks operations (\$10 million). Additional state revenue (\$7 million) is appropriated for housing, water supply, and inflow & infiltration programs.

Thirty-six percent of state MVST revenues are constitutionally dedicated to metropolitan area transit. The budget includes pass-through funds of \$30 million MVST revenues to Suburban Transit Providers.

The Council’s procedure for allocating regional transit revenues draws from and replenishes

operating reserves to maintain target fund balances. Applying the procedure results in a planned use of Transportation reserves of \$18 million for 2016.

FEDERAL REVENUES

The 2016 budget includes \$87 million in federal revenue.

The 2016 budget for the Housing and Redevelopment Authority (HRA) is \$57.7 million. Federal revenues totaling \$53.3 million are passed through as rental assistance payments directly to landlords, and \$4.4 million is used for administration. Transportation receives \$28.6 million to support operations.

PROPERTY TAXES

Metro area property taxes are split among several different governmental organizations. Three organizations that receive the greatest portion of metro area property taxes are counties, cities, and school districts. The Council typically receives about 2% of the revenue from property taxes paid by metro area residents.

PROPERTY TAX LEVY

Where your property tax dollar goes

Source: MN Department of Revenue, Certified Payable 2014 Property Tax Levies

The 2015 property tax levy, payable in 2016, is \$82 million. Property taxes are primarily used to pay debt service on bonds issued to support the Transit and Parks capital programs and to provide pass-through grants to local communities under the Livable Communities Act.

2016 Property Tax Levies: \$82 Million

LIVABLE COMMUNITIES FUND

This fund consists of three active accounts: the Local Housing Incentives Account (LHIA), the Tax Base Revitalization Account (TBRA), and the Livable Communities Demonstration Account (LCDA). Together, they support community investments that revitalize economies, create affordable housing, and connect land uses and transportation. In addition, State statute requires \$1 million from the General Purpose levy be transferred to the LHIA.

RIGHT-OF-WAY ACQUISITION LOAN FUND

The levy does not include an amount for the Right-of-Way Acquisition Loan Fund (RALF), which has sufficient funds available to meet program needs for 2016. The RALF program provides zero-interest loans to local governments to acquire right-of-way along highway corridors in advance of development.

LEVY

The payable 2016 levy of \$82 million represents a 2.0% increase over the amount payable in 2015. Under the levy, a metro area home with an estimated value of \$250,000 will pay a Council-related property tax of approximately \$60 inside the transit taxing communities and \$23 outside the transit taxing communities.

From 2007 to 2016, the inflation factor for state and local governments increased by 24.0%, while Council levies have increased by only 15.4%.

Metro Council Levies Compared with Inflation Factor, Payable 2007-2016

The Council’s statutory limit for general purposes and other non-debt service levies is \$34.7 million for taxes payable in 2016, compared to the levy of \$30.8 million (about 11% below the levy cap).

Levies for debt service are not directly limited, but the levy for Parks and Transit are essentially restricted to bonding authority (that is, the dollar amount of bonds we can issue) as defined in statute.

DEBT SERVICE AND BONDS

Nearly 62% of the total property tax levy is dedicated to paying debt service on bonds issued to support preserving and investing in capital assets for Transit and Parks.

The Council’s total general obligation debt outstanding as of December 31, 2014, is \$1.7 billion. General obligation debt is backed by the full faith and taxing authority of the Metropolitan Council. Approximately 76% (\$1.3 billion) of this debt is for wastewater assets and is paid for by fees collected from wastewater services.

The Council’s bonds receive the highest possible ratings from Moody’s and Standard and Poor’s credit ratings agencies. The Council’s top ratings reflect the sound financial management of the Council and allow us to borrow money at the lowest market interest rates.

**SPENDING BY DIVISION
COUNCIL FUND ACCOUNTING**

Revenue collected by the Council is directed into separate funds. These funds allow the Council to manage spending by directing the revenue dedicated to specific activities or objectives to a group of related accounts.

By maintaining separate funds, the Council is able to comply with laws that require funds to be spent for a specific purpose. For example, the Council may not raise transit fares to pay for wastewater services.

2016 Operating Budget - Uses by Division: \$985 Million

* \$57 million prior to interdivisional allocation

About 98% of the Council’s revenue and other sources is dedicated for a specific use and is directed to a corresponding fund.

The General Fund is used to account for administration functions of the Council’s Regional Administration and Community Development Divisions. The Council has the most discretion in the use of General Fund dollars. The General Fund comprises about 6% of the Council budget and is primarily funded by the general purpose property tax levy and interdivisional allocations.

STEWARDSHIP AND ACCOUNTABILITY

Other Post-Employment Benefits (OPEB)

Paying post-employment benefits, like health care and life insurance premiums, is a significant budget concern for many governments and businesses across the country. The Council took early action to sunset benefits for new hires and adopted a funding plan to address its obligation to future retirees. Our Environmental Services and Regional

Administration Divisions are now “fully funded.” This means enough money has been set aside to pay for future retiree benefits. In 2016, \$3.6 million will be drawn from OPEB assets rather than expensed in division budgets. Metro Transit is expected to be fully funded in 2018.

Expenses for retiree health costs are included in “Salaries & Benefits” and the divisions are reimbursed with a “Transfer From OPEB” under “Other Sources and (Uses)”.

Self Insurance

The Council began self-insuring its medical plan benefit for employees and retirees in 2013. The Council also began self-insuring its dental plan in 2014. For additional information, see Appendix F.

2016 CAPITAL PROGRAM

The Capital Program is a multi-year plan for the preservation, expansion and improvement of the regional transit, wastewater and parks systems. The Council adopts a program level budget for each division (Tables 9, 10 and 11). Projects are grouped into “Programs” based on their similarities (for example, bus replacement, wastewater treatment facility or parks implementing agency). Individual projects within a program can be found in Appendices G-1, G-2, and G-3. Programs carry forward from year to year and are added, removed and changed through the Council’s amendment process.

The 2016 Capital Program totals \$8.11 billion and includes authorized (current) and planned (future) projects.

Capital Program by Function \$8.11 Billion

Transportation (Transitways and Other Transit) is the largest portion of the capital program. Authorized and planned Federal New Starts projects and other transitway projects total \$4.84 billion of the capital program.

Capital Program without Transitways by Category: \$3.27 Billion

Preserving regional capital investments is the highest priority of the capital program. Excluding transitway projects, preserving assets makes up 72% of the capital program. Expansion projects includes land acquisition, increased capacity in wastewater collection and new transit service. Improvement projects include improving water quality or increasing energy efficiency at wastewater treatment plants.

THREE COMPONENTS OF THE CAPITAL PROGRAM

AUTHORIZED CAPITAL PROGRAM (ACP)

The ACP provides multi-year authorization to spend on project costs where funding has been secured and the Council has given final approval to proceed. It is the total amount of all past and present approvals from the Council. The ACP total will change during 2016 as capital projects are completed and removed from the ACP and as capital projects in the Capital Improvement Plan (CIP) secure funding and are moved into the ACP.

Authorized Capital Program by Function: \$4.2 Billion

Because capital projects remain in the program until completed and closed, the ACP does not cover a particular period of time and a majority has already been spent in prior years.

Authorized Capital Program by Spending Period: \$4.2 Billion

CAPITAL BUDGET

The Capital Budget is the amount from the ACP that is expected to be spent in 2016. As capital projects in the Capital Improvement Plan (CIP) secure funding and receive final approval from the Council, the Capital Budget will increase.

Capital Budget by Function: \$534 Million

CAPITAL IMPROVEMENT PLAN (CIP)

The CIP is a six-year capital investment plan. Projects in the CIP have funding sources identified but not yet secured and the Council has not given final approval. Amounts shown in the capital tables represent the year it is anticipated that the Council will be asked to move the project to the ACP.

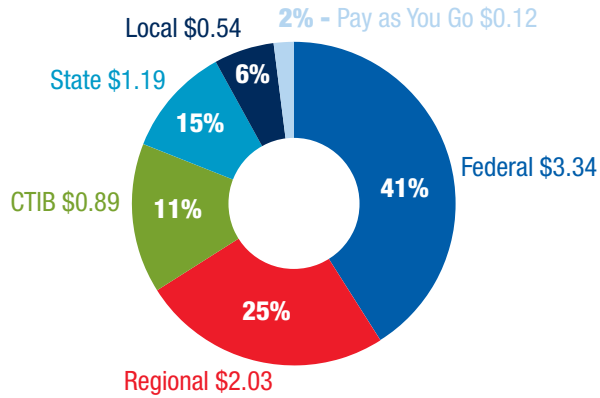

Capital Improvement Plan by Function: \$3.89 Billion

HOW THE CAPITAL PROGRAM IS FUNDED

Financing for the Capital Program comes from federal, state and local capital grants, regional borrowing and other sources.

*Capital Program by
Funding Source: \$8.11 Billion*

Each division has its own funding sources (see Table 8) that may not be intermingled. The Parks capital program includes significant state funding and approximately 18% from regional borrowing. The Transportation Division capital program has a mix of funding sources, including significant grants from federal, state, and local authorities and the Counties Transit Improvement Board, with approximately 8% funded through regional borrowing. The Environmental Services Division capital program is financed almost entirely (92%) through regional borrowing.

More information on regional borrowing can be found in the Fiscal Impacts section.

CAPITAL PROGRAM TABLES

FISCAL IMPACTS

This section provides a look at how the Council impacts the residents of the region through fees for services and property tax levies.

FEES AND FARES FOR SERVICES

The Council’s Operating Budget includes \$364 million in fees charged directly to those using our services.

WASTEWATER FEES

The Environmental Services Division collects \$216 million in municipal and industry-specific wastewater charges paid by the homes and businesses that are connected to the regional sewer system. These revenues are used for operations, debt service, and capital project costs.

In addition, the Environmental Services budget includes the use of \$39 million of sewer availability charges (SAC) that was collected from developers when they applied for building permits. SAC may only be used to pay for debt service and its own administrative costs.

TRANSPORTATION FARES

Passenger fares, contracts and special-event revenues, paid by transit riders, provides \$108 million to the Transportation Division’s operating budget. There are a number of programs and discounts available based on individual circumstances. Standard fares for adults are shown in the following table.

	Non-Rush	Rush Hour
Bus & Light Rail	1.75	2.25
Express Bus	2.25	3.00
Downtown Zone	0.50	0.50
Metro Mobility	3.00	4.00
NorthStar fares are \$3-6.00 based on distance		

Downtown Zone fares are for short rides that begin and end in either the Minneapolis or Saint Paul zones. Additional information about transit fares can be found at www.metrotransit.org.

PROPERTY TAX LEVIES

The Council’s Operating Budget includes \$82 million in regional property tax levies. An explanation of the individual levies that make up the \$82 million can be found in the “Financial Overview” section.

2016 Property Tax Levies: \$82.0 Million

For 2016, the General Purposes, Livable Communities Demonstration Account and Parks Debt Service levies total \$32 million. Each piece of property in the metropolitan area pays a part of the levy based on how much the property is worth. The metropolitan area is defined in state law as the seven metro counties except for the cities of Northfield, Hanover, Rockford, and New Prague. (Minnesota Statutes, Section 473.121).

The \$45 million Transit Debt Service levy is paid by a slightly smaller area called the Transit Taxing Communities. It includes all of the cities in the Transit Taxing District as defined in state law, plus any cities that voluntarily join. (Minn. Stat., Sec. 473.446) To date, the cities of Columbus, Forest Lake, Lakeville, Maple Plain and Ramsey have joined.

The remaining levy – the Tax Base Revitalization-Fiscal Disparities – is \$5 million, received from the Fiscal Disparities Program. The Fiscal Disparities Program is a tax-base sharing program within the metropolitan area and is funded by commercial and industrial property.

IMPACT PER HOUSEHOLD

The estimated total cost of Metropolitan Council services for a homeowner who owns a \$250,000 home in a city within the metropolitan area and Transit Taxing District is \$210.00 for 2016. This represents a 3.8% increase from 2015.

REGIONAL BORROWING

Regional borrowing includes the issuance of long-term general obligation bonds and loans from the state Public Facilities Authority (PFA). This long-term debt becomes an obligation of the Council and is repaid in the operating budget (Table 5) through wastewater charges and property tax levies.

WASTEWATER

The Environmental Services capital program is financed almost entirely through regional borrowing. The Council has the authority to issue wastewater debt as necessary to support the capital program and issues general obligation revenue bonds and utilizes general obligation-backed revenue loans from the state PFA. PFA loans are secured to the maximum extent possible to take advantage of the below-market interest rates of the PFA program.

TRANSIT

Bonds issued for the Transportation capital program leverage other funding sources by providing required matching funds. Transit bonding authority must be requested from the Legislature and lapses when the bonds are issued. Transit also utilizes loans from the state PFA when available. Transit debt is repaid with the Transit Debt Service Levy.

PARKS AND OPEN SPACE

Bonds are issues for parks as a match for state funding and to acquire land for the regional park system. Bonding authority for parks is revolving,

with no more than \$40 million outstanding at any time, and can be reused as existing bonds are retired. This debt is repaid with the Parks Debt Service Levy.

	Current Authority	Available 12/31/15
Parks	40.0 M	27.4M
Transit	120.2 M	120.2 M
Wastewater	Unlimited	Unlimited

FUTURE BORROWING

The Council anticipates borrowing \$571million over the next six years to fund the projects that are anticipated to be authorized in the capital improvement plan.

Regional Borrowing, 2016 to 2021: \$571 Million

OUTSTANDING DEBT

Outstanding debt at the end of the next six years is projected to be approximately 1.66 billion.

Outstanding Debt by Function, 2016 - 2021

SERVICES

Regional Administration, which includes the Offices of the Chair and Regional Administrator, provides leadership and support services for the entire Council.

The **Office of General Counsel** provides advice and preventative legal services to the organization to assist in compliance with all appropriate federal and state requirements.

The **Communications** unit is responsible for corporate communications, media relations, employee communications, and communication assistance to Council divisions.

Evaluation and Audit conducts audits, program evaluations and internal controls.

Governmental Affairs coordinates Council-related public policy issues with state and local government policymakers.

The **Office of Diversity and Equal Opportunity** is responsible for small-business development programs that include the Disadvantaged Business Enterprise, Women and Minority Business Enterprise, and Small Business in Rural Areas programs. This unit also administers the Council's Affirmative Action Plan and Equal Opportunity policies and programs, and it investigates discrimination complaints.

Finance is responsible for payroll and budget functions, financial analysis, capital finance strategy and accounts receivable/payable. The unit also coordinates the issuance of Council-sponsored debt.

Contracts and Procurement assists all divisions in procuring goods and services. **Information Services** provides the Council's core computer expertise and information management, including the organization's entire network of computer resources, Geographic Information System and the MetroGIS consortium.

Risk Management identifies, evaluates and manages the Council’s exposure to loss through risk-control and risk-financing methods.

The **Human Resources** unit is responsible for collective bargaining, grievance and arbitration, recruitment and selection, compensation administration, and group benefit programs for the Council’s employees and retirees. The unit also coordinates learning and organizational development activities and provides training and development services.

PRIORITIES, GOALS AND OBJECTIVES

Goals and objectives for Regional Administration include:

- Supporting the Council mission, priorities and policies.
- Providing high-quality support services cost-effectively.
- Providing strong customer service to operating divisions.
- Providing strong financial management for the organization.
- Attracting and maintaining a skilled workforce.
- Providing technology that supports the Council’s operations.

CHALLENGES AND OPPORTUNITIES

Attracting and retaining skilled employees is critical to providing efficient and cost-effective regional services. Like many organizations today, Council employees are approaching retirement age, and the Council needs to carry out strong recruiting and training programs to maintain its high-quality workforce.

The Council’s operating divisions increasingly rely on information technology to do their jobs efficiently, quickly and accurately. The Information Services department works closely with the operating divisions to develop and carry out technology solutions that achieve that goal. The challenge is to maintain the Council’s complex information systems and respond appropriately to new technology.

Another continuing challenge is financing essential regional services while keeping property taxes, wastewater service charges and passenger fares at reasonable, competitive levels. The Finance department works with operating divisions to minimize property tax increases and maintain competitive user charges in the Environmental Services and Transportation divisions.

Finance and Budget operations strive to ensure the Council maintains its strong financial management, including adequate financial reserves and AAA bond rating, which enables capital financing at the lowest possible interest cost.

OPERATIONS SOURCES OF FUNDS

The Council’s operating divisions fund 90% of the Regional Administration budget by paying for the services they receive directly or benefit from. The divisions are billed each month and pay with the revenue sources of those divisions. The rest of the Regional Administration budget is funded with the Council’s general purposes property tax levy, investment earnings and other miscellaneous revenues.

*2016 Regional Administration Division
Operating Budget - Sources of Funds: \$56.9 Million*

USES OF FUNDS

Approximately 84% of the Regional Administration budget is for salaries and benefits, and consultant and contractual services. Hardware and software maintenance and license fees budgeted in Information Services represent about 70% of contracted services and benefit the entire organization.

*2016 Regional Administration Division
Operating Budgets - Uses By Category: \$56.9 Million*

STAFFING

The 2016 budget for Regional Administration includes a total full-time equivalent of 313. Staff in RA support the growing needs of the divisions, meet the increasing compliance requirements in the Office of Diversity and Equal Opportunity, and expanding transparency through technology.

SERVICES

As a public service division, Metropolitan Council Environmental Services (MCES) treats approximately 250 million gallons of wastewater daily at eight regional treatment plants. MCES operates approximately 610 miles of regional sewers that collect flow from more than 5,000 miles of sewers owned by the 108 communities that are connected to the Metropolitan Disposal System (MDS). The MDS serves about 95% of the population in the seven-county metropolitan area.

Wastewater System Operated and Maintained by Environmental Services

MCES continues near-perfect compliance with both federal and state clean water standards and data requirements, with six plants maintaining award winning 100% compliance for more than five years (two of those for more than 20 years).

MCES meets these standards while holding wastewater service rates 40% below the national average for similar-sized utilities. The most recent financial survey by the National Association of Clean Water Agencies (NACWA) shows that, among reporting peer agencies, the Twin Cities area has the fifth lowest average retail sewer cost per household.

In addition, MCES:

- Works with approximately 850 industrial clients to substantially reduce the amount of pollution entering our wastewater collection system.
- Partners with a variety of communities and organizations to monitor and analyze water resources in the region.
- Analyzes and plans for water supply in the region.
- Ensures sufficient sewer capacity exists to serve planned future development.

CHALLENGES AND OPPORTUNITIES

The challenges facing the Environmental Services Division include:

- Meeting regulatory requirements that continue to get more stringent.
- Maintaining competitive wastewater rates and charges.
- Meeting customer expectations for high-quality wastewater services and engagement in MCES decisions.
- Supporting proactive programs to prevent inflow and infiltration of clear water into the regional sewer system.
- Maintaining and rehabilitating aging wastewater facilities and equipment.
- Financing necessary capital projects while minimizing borrowing costs.
- Collaboratively researching and planning for regional water sustainability with our partners.
- Providing a productive and safe workplace for employees.
- Pursuing environmentally friendly and cost-effective energy solutions.

OPERATIONS SOURCES OF FUNDS

The wastewater functions of MCES, which is run as a governmental enterprise, are entirely funded by user fees. The Council's rate-setting philosophy is that users should pay the regional cost of service. Revenues include the metropolitan wastewater charge (MWC) allocated to customer municipalities based on flow volume, industry-specific retail charges

based on service provided, sewer availability charges to municipalities (SAC) based on capacity demand, and miscellaneous revenues.

*2016 Environmental Services Division
Operating Budget - Sources of Funds: \$266 Million*

Metropolitan Wastewater Charge (MWC).

Communities pay MCES for the flow entering the regional wastewater system from within their own boundaries. Each community pays a municipal wastewater charge based on their flow and a uniform rate for wastewater services. Total revenue from MWC in 2016 is budgeted to increase 5.4%, but charges to individual cities will vary depending on how much a city's flow differs from the average. For example, if a city's flow increases more than the increase in the system's average flow, that city's MWCs will go up more than 5.4%.

Metropolitan Sewer Availability Charges (SAC).

Communities pay MCES for additional capacity required by new development or increased industrial or commercial use. Communities typically collect these upfront SAC fees from property owners at the time they issue a building permit. Generally, one SAC unit equals 274 gallons of potential daily wastewater flow capacity. A freestanding single-family residence is charged one SAC unit. Each community pays MCES the metropolitan rate for SAC, but communities can add local fees and thus charge higher rates. The metropolitan SAC rate will not increase for 2015 and remains at \$2,485 per residence or equivalent unit.

The SAC revenue by law is used to finance the reserve capacity portion of capital project costs (or debt service) to build and maintain the wastewater system. Reserve capacity (the unused portion of the system built for future

users) averages over time about 30% of total capacity.

Industry-Specific Charges. Industries pay MCES directly for a variety of charges that are targeted to specific customer services. These include:

- Industrial strength charges
- Liquid waste hauler load charges
- Industrial discharge permit fees
- Temporary capacity charges

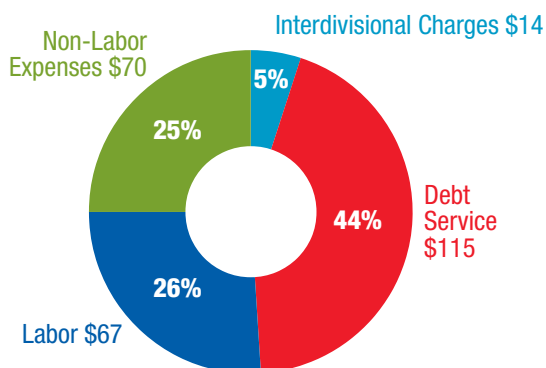

The industrial-strength charge provides roughly three-quarters of total industry-specific revenues. It covers the higher treatment costs of industrial waste that has greater strength than domestic waste measured analytically for two parameters.

Other Revenue. The remaining 2016 budgeted revenue includes:

- Interest earnings
- Revenue expected from state contracts for environmental monitoring
- State Clean Water Funds for water supply research and planning projects
- Miscellaneous revenues

USES OF FUNDS

*2016 Environmental Services Division
Operating Budget - Uses by Category: \$266 Million*

MCES expenses are categorized in one of four areas: labor expenses, non-labor expenses, debt service, and interdivisional charges.

Labor. Full-time equivalent employees are budgeted at 624 for 2016, continuing the effort to manage labor costs while addressing the needs of the wastewater collection infrastructure and making significant process improvements. Expenses for medical coverage have increased only modestly, and remain lower compared to recent history as the Council began self-insuring in 2013. Labor expenses account for 26% of total annual budget.

Non-Labor Expenses. This category includes primarily operational expenses such as contracted maintenance and other services, utilities, materials, chemicals, and capital outlays. In addition, this category includes “pay-as-you-go” capital project expenses, which are not financed through bonds or loans. In total, the 2016 budget for these expenses represents 25% of the total annual budget.

Debt Service. Debt service includes principal and interest on Council wastewater bonds and Minnesota Public Facilities Authority loans. Funded entirely by wastewater revenues, debt service costs account for 44% of the annual budget.

Interdivisional Expenses. Interdivisional charges are the cost of administrative and support services provided by Regional Administration to the Council’s divisions and includes both “shared” corporate costs and “assigned” costs that are specific to particular tasks or projects. Examples of units making these charges include Human Resources, Information Services, Risk Management, and Procurement. These represent 5% of the annual budget.

CAPITAL SOURCES OF FUNDS

The regional wastewater system capital improvements are paid for by grants when available, using sewer fees directly (known as pay-as-you-go), or financed by Metropolitan Council wastewater bonds (GO) and Public Facilities Authority loans (PFA).

USES OF FUNDS

2016-2021 Environmental Services Division
CIP - Sources of Funds: \$328 Million

Each year the Council adopts a capital improvement plan (CIP), capital improvement program (multi-year funding authorizations for projects), and a capital budget (annual funding appropriation for projects in aggregate).

2016-2021 Environmental Services Division
CIP - Uses by Objective: \$328 Million

The three objectives of the capital improvement plan are:

- Preserve infrastructure investment through rehabilitation and replacements. This represents 65% of the CIP.

- Expand the system’s capacity through treatment plant and interceptor expansions and interceptor extensions.
- Improve the quality of service by responding to more stringent regulations (as is known now only), reusing wastewater, increasing system reliability, and conserving and generating energy.

The costs of the regional wastewater system capital program are paid by grants when available, using sewer fees directly, financed by Metropolitan Council wastewater bonds and/or Minnesota Public Facilities Authority loans.

Water quality has improved substantially due to the reduced pollutant discharges from wastewater treatment plants. However, long-term water quality goals and standards established by the Minnesota Pollution Control Agency may require an additional substantial reduction of pollution. Federal law focuses compliance and enforcement authority on point sources of pollutant discharges, that is, wastewater treatment plants and urban storm water systems. As a result, the Minnesota Pollution Control Agency may impose more stringent discharge limits on the Council and its customer communities. Achieving compliance with more stringent limits (not required now) could require significant increased operating and capital costs arising from increased chemical addition, pumping, filtration, and solids processing facilities or other major capital improvements.

SUSTAINABILITY

Sustainability efforts of MCES include: (1) water sustainability; (2) energy conservation and generation; and (3) solid waste reuse and reduction.

Water. Two interrelated objectives are: (1) sustaining the region’s water resources to provide water supply and water quality that support the region’s growth and quality of life, and (2) investing the region’s financial and technical resources to maximize benefits. Water supply, nonpoint-source pollution control, and wastewater treatment and reuse should be part of an integrated system that is optimized to meet these regional objectives.

Wastewater reuse has the potential to meet part of the region's water supply needs. Investing strategically to further the effectiveness of the region's program for nonpoint-source pollution prevention and control may also provide better value for the region than investing to meet more stringent wastewater discharge limits.

In addition, the MCES inflow and infiltration (I/I) initiatives may be viewed as contributing to water sustainability by limiting the amount of clear water that enters the sanitary sewer (and then lost to the region) and minimizing the risks of water pollution from spills and outflow from cracks. Funding to prevent I/I into regional pipes is part of the rehabilitation work in the CIP. Funding for I/I prevention in the local community sewer pipes is a municipal responsibility, although MCES does provide a grant program. Property owners are responsible for preventing I/I originating from their property, although MCES and cities have provided small - grant programs.

Energy and Emissions. MCES remains on track to meet its 25% purchased-energy reduction goal by 2015 (base year 2006). Fully attaining this goal will result in savings of over \$5 million annually, beginning in 2016. In addition to generating energy from

processing biosolids, MCES has been and continues to implement energy conservation by selecting the appropriate type of wastewater treatment and process, optimizing performance, installing higher-efficiency equipment (motors, pumps) and lighting, and reducing building-energy use. MCES is also pursuing the purchase of energy from solar-power generation facilities. Energy conservation and renewable-energy generation by MCES contribute to reducing its purchased energy as well as lowering greenhouse and other air emissions. The Council has tracked and reported annual emissions using the Climate Registry protocols since 2007.

Waste. The wastewater system plan continues to support the use of wastewater treatment biosolids for energy generation for in-plant uses. The Metropolitan Plant uses thermal processing that reduces the biosolids to a small volume of inert ash, while recovering energy that is converted to electricity and steam for plant usage. Moreover, MCES is studying the beneficial use of ash for its value as a phosphorus fertilizer. The Blue Lake and Empire plants use anaerobic digestion to reduce biosolids volume prior to its agricultural use and to produce biogas (methane) for in-plant uses.

SERVICES

The Metropolitan Council's Transportation Division operates, administers and coordinates public transit services in the Twin Cities metropolitan area. Two units of the Council's Transportation Division – Metro Transit and Metropolitan Transportation Services (MTS) – carry out the transit programs.

The Council also serves as the federally designated Metropolitan Planning Organization and manages the allocation of federal transportation funds. In this role, the Transportation Division provides regional transportation planning for the aviation, highway, transit, and bike/pedestrian systems. Every four years the Council develops and updates the 20-year regional transportation policy plan and annually produces the federally required four-year Transportation Improvement Program (TIP) for the metropolitan area.

Metro Transit is the largest direct operator of regular-route transit service in the Twin Cities region, including regular-route bus, light rail and commuter rail. It accounts for about 82% of the total operating expenses for the Council's Transportation Division.

Metro Transit directly operates a network of 132 regular routes served by a fleet of 911 buses. Metro Transit operates the METRO Blue Line and Northstar Commuter Rail, and began operation of the METRO Green Line in June 2014. Metro Transit will operate the Green Line Extension (Southwest light rail) and Blue Line Extension (Bottineau Boulevard) when those lines are completed.

Metropolitan Transportation Services is responsible for regional transportation planning and provides and coordinates transit services within the region through contracts with private providers. Contracted services account for about 3% of total operating expenses of the Transportation Division.

(\$ IN 000S)

Services managed by MTS include the following:

- Metro Mobility provides on-demand transit service for certified riders whose disabilities prevent them from using the regular-route transit system. Metro Mobility provides service in the region to complement regular-route service, as required by the Americans with Disabilities Act. Metro Mobility will have a 2016 fleet of 494 vehicles. Service is operated by multiple contractors.
- Contracted regular-route service provides regular-route service by nine separate contracts with private, governmental, and nonprofit organizations. Contracted regular-route services will have a 2016 fleet of 92 vehicles.
- Transit Link provides dial-a-ride transit service through contracts with private, nonprofit and governmental agencies. These programs primarily serve transit customers in the region where regular-route service is not available. Transit Link will have a 2016 fleet of 86 vehicles.
- Metro Vanpool is a program that provides vanpools through contracts with a private company. Typically these vanpools are formed either in areas without regular-route transit service or serve people who work shifts that are outside of normal commuting times. The Metro Vanpool is budgeted for a 2016 fleet of 100 leased vehicles.
- Suburban Transit Providers (STP) consist of 12 communities that have chosen to provide their own transit service as separate transit authorities. STPs provide regular-route and dial-a-ride programs. STPs receive funding from the State Motor Vehicle Sales Tax (MVST) and regionally allocated MVST revenue. Suburban Transit Providers will operate a 2016 fleet of 321 vehicles owned by the Council.

CHALLENGES AND OPPORTUNITIES

The Transportation Division faces considerable budget challenges in supporting its operations and capital needs.

- Increases in congestion are having a significant impact on citizens and businesses.

- 8% annual growth in Metro Mobility demand is putting pressure on it's operating budget.
- Transit operating funding per capita is lower than peer regions, which limits the amount of transit service that can be made available.
- Existing capacity for bus facility storage is nearing its limit to meet ridership demand with service and buses.
- Regional transportation requires reliable dedicated funding to support continued base-line service and future service growth needs and expansion.

OPERATIONS

The Transportation Division's 2016 Operating Budget of \$514 million includes a full year of METRO Green Line light-rail transit service between Minneapolis and Saint Paul, and the demand for expected ridership growth in the transit system.

2016 Transportation Division Operating Budget Sources of Funds: \$598 Million

Funding for operations comes from the Motor Vehicle Sales Tax, state appropriations, federal and local funding, investment earnings, passenger fares and other revenues, including advertising. The Counties Transit Improvement Board (CTIB) provides operating funding for light rail, commuter rail and bus rapid transit services. Sherburne County and the Minnesota Department of Transportation (MnDOT) also provide operating funds for commuter rail services.

*2016 Transportation Division Operating Budget
Uses by Category: \$598 Million*

The Transportation Division operating budget is developed around a group of key financial objectives:

- Support the Council’s regional development plan, *Thrive MSP 2040*, and regional Transportation Policy Plan (TPP)
- Grow transit ridership
- Construct a transit budget that balances revenues and expenses over four years
- Mitigate gaps in the transit financial structure over time
- Minimize impact on Council property tax levies
- Maintain reserves at policy levels

The Transportation Division operating budget for 2016 includes a planned use of reserves and includes a number of assumptions:

- Maintain 2015 service levels and begin the A Line BRT in mid 2016
- Meet a projected 8% ridership growth in the Metro Mobility ADA program
- Attain Metro Transit ridership of 87.5 million, including 11.0 million for the METRO Green Line
- Pay an average diesel fuel cost of \$2.69 per gallon and \$3.75 per gallon for gasoline
- Receive operating funding from the Counties Transit Improvement Board for METRO Blue Line, Northstar, METRO Green Line, I-35W South BRT Express, Cedar Avenue BRT Express, and METRO Red Line BRT

- Complete Project Development and seek entry into the next federal phase (engineering stage) for the Green Line Extension
- Include full-year METRO Green Line light rail service
- Continue review of the regional fare policy

METRO TRANSIT BUS SERVICE

Metro Transit is the largest operator of regular-route bus service in the Twin Cities region and is a key part of the Council’s commitment to operating quality transit service in an inclusive, customer-focused and efficient manner. Metro Transit is one of the country’s largest transit systems, providing more than 90% of the regular-route public transportation in the Minneapolis-Saint Paul metro area.

The Metro Transit budget for bus operations reflects expenses of \$330 million, with a planned use of reserves of \$13.8 million.

Major sources of revenues include passenger fares, Motor Vehicle Sales Tax revenue, and the state General Fund.

Major sources of expenses include salaries and benefits, fuel, allocations from Regional Administration, and materials and supplies. Expense increases in 2016 are attributed to additional employee costs for planned service increases expected in mid 2016 for the A Line BRT, service for overloads, bridge-support bus service that substitutes for light rail, diesel fuel, Council support services for computer systems and maintenance support, and support for the Strategic Initiatives Department and additional police operations.

METRO TRANSIT BLUE LINE LIGHT RAIL

The METRO Blue Line operates between downtown Minneapolis, MSP Airport and the Mall of America. Metro Transit’s operating budget for the METRO Blue Line reflects expenses of \$34.1 million.

Major sources of revenue include passenger fares, the state General Fund, and a 50% net subsidy contribution from the Counties Transit Improvement Board.

Major sources of expenses include salaries and benefits; electricity expenses for light rail vehicle propulsion; allocations for shared Metro Transit administrative services, materials and supplies; and allocations from Regional Administration.

METRO TRANSIT NORTHSTAR COMMUTER RAIL

The Northstar Commuter Rail operates between Big Lake and Target Field in downtown Minneapolis, with six stations along the route. Weekday service consists of five trains serving Minneapolis and one train serving the reverse commute. The Metro Transit operating budget for commuter rail reflects expenses of \$18.3 million, with a planned use of reserves of \$300,000.

Major sources of revenue include passenger fares, Motor Vehicle Sales Tax revenue, and contributions from the Counties Transit Improvement Board, Sherburne County, and Greater Minnesota MnDOT.

Major sources of expenses include salaries and benefits, diesel fuel, materials and supplies, and a professional services contract with Burlington Northern Santa Fe (BNSF) to operate the commuter rail. Operations of the commuter rail are performed under contract by BNSF with maintenance performed by Metro Transit.

METRO TRANSIT GREEN LINE LIGHT RAIL

The METRO Green Line (Central Corridor Light Rail) began operations in June 2014 with service between downtown Saint Paul and downtown Minneapolis via University Avenue and the University of Minnesota. The corridor also travels through the State Capital Complex and the Midway area. The Metro Transit METRO Green Line operating budget reflects a full year of revenue-service expenses of \$36.7 million.

Major revenue sources will include passenger fares, the state General Fund and a 50% net subsidy contribution from the Counties Transit Improvement Board.

Major sources of operating expenses include salaries and benefits; electricity expenses for light rail vehicle propulsion; allocations for

shared Metro Transit administrative services, materials and supplies; and allocations from Regional Administration.

CONTRACTED REGULAR ROUTE

Metropolitan Transportation Services provides regional transit service through its contracted regular-route program. MTS contracts with private vendors to operate regularly scheduled service throughout the metropolitan area.

The 2016 program budget for the contracted regular-route program is \$20.8 million, a 4% decrease from the 2015 budget. The decrease is driven by the Council's restructuring of bus service to connect to the Green Line to meet riders' needs as well as changes in bus sizes. Contracted services will provide 16,000 more service hours than in 2015.

TRANSIT LINK

Metropolitan Transportation Services' Transit Link program provides demand-responsive transit service in portions of the metropolitan area. MTS contracts with private vendors to operate Transit Link service.

The 2016 program budget for Transit Link is \$6.8 million, a 2% increase over 2015. The increase is driven by cost inflation and a modest increase in service levels to better meet demand.

METRO MOBILITY

Metropolitan Transportation Services provides Metro Mobility transit service for certified riders who cannot use regular fixed-route buses due to a disability or health condition. The service offers dial-a-ride service to persons certified under the Americans with Disabilities Act. Service is provided by private vendors under contract with MTS.

The 2016 program budget for Metro Mobility is \$62.2 million, the same as the 2015 adopted budget. Flat expenses result from service restructuring and lower fuel prices, off-setting inflation in other areas of the budget and service level increases to meet demand.

CAPITAL

The Transportation Division capital budget reflects the primary priorities of (1) maintaining

the current system by replacing vehicles according to fleet management plans and maintaining/repairing existing facilities, and (2) building transitways and expanding the bus system to meet future ridership and service demands.

The 2016 capital program reflects the following assumptions:

- Federal funding under the MAP-21 legislation will increase 2.0% to 2.5% per year.
- Regional transit capital expenditures increase at 4.5% per year.
- Inflation affecting construction and bus operations increase at 2.5% to 3.5% per year.
- There will be additional rail maintenance needs with operations of the METRO Green Line and Green Line Extension.
- Expanding the bus fleet will require additional vehicle storage capacity.

The 2016 capital program will support:

- Construction of the Green Line Extension with revenue service in 2020.
- Completion of a new Transit Police facility.
- Bus replacement, facility energy enhancements, improvements to accessibility for people with disabilities, signage enhancements, and technology upgrades.
- Programs for overhauling light rail and commuter rail vehicles.
- Partial funding for two bus rapid transit lines – Snelling Avenue A Line in Saint Paul and Penn Avenue C Line in Minneapolis.
- “Heywood II” garage design and construction.
- Enhancements to Downtown East area.
- Completion of Woodbury East Creek park-and-ride.

SOURCES OF FUNDS

Major sources of revenues in the 2016-2021 Transportation capital improvement program include federal funds, regional bonding, the state General Fund, state general obligation bonds, the Counties Transit Improvement Board, and other local funding.

Within its statutory bonding authority, the Council issues long-term debt to finance transit projects.

*2016 - 2021 Transportation Division CIP
Source of Funds: \$3.37 Billion*

Federal funding is the largest source and includes the following:

- MAP-21 legislation (5307 Formula Funds, 5337 State of Good Repair, and 5339 Bus and Bus Facilities)
- Congestion Mitigation Air Quality (CMAQ) funds allocated competitively through the process overseen by the Council’s Transportation Advisory Board
- New Starts funding allocated at the discretion of Congress for the Green Line light rail and

The remaining sources of capital funding include:

- The state General Fund, state general obligation bonds, and State Trunk Highway funds. These funds have been approved and authorized for specific capital projects.
- Regional Transit Capital (RTC), which is used primarily for fleet and for matching of federal funds.
- Transitway funding from the Counties Transit Improvement Board and other local funds provided by counties and railroad authorities.

USES OF FUNDS

2016 - 2021 Transportation Division CIP
Use of Funds by Functions: \$3,37 Million

Major expenditures in the 2016-2021 Transportation Division capital improvement plan include the following:

- Uses of funds by department consist of transitways 79%, fleet 15%, facilities 3%, other providers (non-fleet) 1% and technology and equipment 2%. The transitways category is the predominant user by department due to the construction of the Green Line Extension and bus rapid transit.
- Uses of funds by category include transitways 79%, preservation 15%, and expansion 6%. If the 2016-2021 capital improvement program excluded transitways, the remaining capital program would focus on transit system preservation at nearly 71%.

STAFFING

Staffing for the Transportation Division includes bus operators, mechanics, police and administrative staff.

PERFORMANCE MEASURES

Key performance measures for the Transportation Division include measurements of operating and budget efficiencies by type of operation. Performance is measured by comparison with prior-year performance and with comparison to peer agencies. Key performance measures for the Transportation Division include:

- Ridership by type of transit service
- Fleet size and peak bus level
- Revenue miles and revenue hours operated
- Cost per passenger trip
- Operating expense per revenue mile
- Operating expense per revenue hour
- Operating expense per passenger mile
- Fare box recovery ratio
- Average revenue per passenger trip
- Boardings per revenue hour
- Subsidy per passenger trip

In addition to these performance measures, comparisons of actual operating results versus budget are monitored during the year and are reported on a quarterly basis. This allows the Council and operations management to closely monitor operations performance and make adjustments as necessary in a timely manner.

COMMUNITY DEVELOPMENT DIVISION

SERVICES

The Community Development Division:

- Provides rent payments to landlords that help very low-income residents pay their rent.
- Makes grants to communities for projects that use land efficiently, create affordable housing, and clean up polluted sites.
- Plans for the regional park system and provides funding for the purchase of land and improvements for those parks.
- Develops a 30-year plan that helps guide the future growth of the region (*Thrive MSP 2040*).
- Helps communities plan for their growth by supplying information, best practices and analysis of regional issues.
- Reviews community plans for impacts on the region's transportation, sewer, and parks systems.

(\$ IN 000S)

PRIORITIES, GOALS AND OBJECTIVES

The 2016 priority goals and objectives of the Community Development Division include:

- Providing technical assistance to local governments as they begin updating their required comprehensive plans, via the updated Local Planning Handbook, Sector Representatives and launching a new series of workshops and training for local governments.
- Working to intentionally leverage multiple policy tools across all Council system and policy plans to address regional challenges and opportunities.
- Providing information, services and investments to expand the use of regional parks by all residents across race, ethnicity, income and ability. Implementing a program in the Metro HRA to provide mobility and post - move counseling assistance to Housing Choice Voucher holders to ensure success in neighborhoods of choice.
- Distributing grants to communities to support equitable development.

- Collaborating with regional partners to develop tools and identify best practices for climate change planning.
- Convening and engaging community, local, state, federal, business, and other partners to develop community investment strategies to bring opportunity to low-wealth neighborhoods.

CHALLENGES AND OPPORTUNITIES

The Council's new *Thrive MSP 2040* identifies five desired outcomes that define a 30-year vision for the region. The work of the Community Development Division plays a part in each of these five outcomes. Accomplishing the division's responsibilities toward the five outcomes includes both challenges and opportunities:

Stewardship

- Funding the purchase of priority natural resources to include in the Regional Park System
- Encouraging communities to locate and design development that preserves the natural environment, supports the transit system, provides a mix of housing costs, and uses land efficiently
- Providing information and best practices to manage stormwater and protect natural resources

Prosperity

- Helping communities protect land around airports, railroads and industrial areas for similar land uses
- Encouraging communities to preserve farm land and reduce development pressures on this limited resource
- Requiring communities to plan for water sustainability in their plans
- Providing information and assistance so all communities benefit from a regional strategy for economic development

Equity

- Improving the use of regional parks by all residents of the region across race, ethnicity, income and ability
- Using grants to help create mixed-income neighborhoods and affordable housing choices across the region
- Developing information and services that help renters with vouchers choose the community and neighborhood that best meets their needs
- Partnering with communities so decisions are made with people, not for people

Livability

- Increasing access to nature and outdoor recreation through regional parks and trails
- Providing housing choices for everyone
- Using resources to support walkable neighborhoods with access to transit service
- Promoting healthy communities and active living through land use, planning, and investments

Sustainability

- Promoting and funding compact, well-connected, pedestrian-friendly development
- Encouraging communities to protect farm land for local food production
- Supporting the Regional Parks to protect open spaces, improve local wind circulation, and reduce the impact of the urban heat island
- Expanding the information and assistance to communities for planning climate change

OPERATIONS SOURCES OF FUNDS

Funding from federal, state and local property taxes make up the majority of the revenue for the Community Development Division. Planning work and administrative expenses are funded by local property taxes. The Metropolitan Housing and Redevelopment Authority (Metro HRA) earns fees for program administration, paid to the Metro HRA by federal and state governments. The rent subsidy payments to landlords are passed through the Metro HRA from federal and state government.

2016 Community Development Division
Operating Budget - Source of Funds: \$112 Million

USES OF FUNDS

The largest part of the Community Development Division budget are funds that pass through the Council to pay for rent payments to landlords, Livable Communities Act grants to communities, and grants to parks implementing agencies for park operations.

2016 Community Development Division
Operating Budget - Uses by Category: \$112 Million

CAPITAL SOURCES OF FUNDS

The capital program for the Community Development Division provides funding for regional parks and trails. The sources of funds include state appropriations and regional bonds. The regional borrowing is used as a local match to the state appropriations.

2016 - 2021 Community Development Division
CIP - Source of Funds: \$196 Million

USES OF FUNDS

The capital program provide grants to 10 park implementing agencies. The park implementing agencies use the grants to purchase land, develop new or rehabilitate existing park facilities.

2016 - 2021 Community Development Division
CIP - Uses by Function: \$196 Million

Allocation of \$290 million in Authorized and Planned Grants by Park Implementing Agency

STAFFING

The Community Development Division has two departments made up of five work units with 86 full-time equivalent employees. The 2016 budget adds new positions to complete new work identified in *Thrive MSP 2040* relating to climate change, housing-search counseling in the HRA, and expanding equitable use of regional parks.

PERFORMANCE MEASURES

Measurable outcomes of the Community Development Division services are:

- Number of annual visits to Regional Parks
- Number of acres cleaned of pollution with assistance from Tax Base Revitalization grant funds
- Increase in the net tax capacity of land cleaned of pollution with the assistance of Tax Base Revitalization grant funds
- Number of jobs created or retained with the assistance of Livable Communities Act grant funds
- Amount of public and private funds leveraged with Livable Communities Act grant funds
- Number of affordable housing units created or preserved with the assistance of Livable Communities Act funding
- Percent of awarded federal rental assistance funding used to assist low-income households with affordable housing

METROPOLITAN COUNCIL OPERATING CAPITAL

METROPOLITAN COUNCIL SELF-INSURED BENEFIT PLANS

MEDICAL HEALTH PLAN

The Council self-insures its medical plan benefit for employees and eligible retirees. Plan activity is recorded in an internal service fund. Operating divisions budget and pay monthly premiums to the internal service fund and medical claims and fees are paid directly from the fund. Premium revenues include both an employer and employee/retiree share as established in bargaining agreements.

Total premiums are intended to cover overall plan costs and maintain a target reserve and balance. Plan reserves totaled \$23 million at year end 2014 and are projected to grow by \$4 million by year end 2015. Plan reserves, along with 125% aggregate stop loss and \$500,000 specific stop loss insurance minimize cash flow risk and protect against unforeseen claims or plan expenses that may exceed annual revenues in a given year.

Plan performance exceeded the financial plan for 2014 due primarily to claims experience below the medical trend rate. Average monthly enrolled membership was 9,488.

The financial plan anticipates addition to reserves through 2015. The total premium rate remained flat 2012 - 2015. The 2016 budget anticipates 2% increase in the total premium rate to cover plan costs. Claims are anticipated to grow by 7% in future years.

	ACTUAL	FINANCIAL PLAN		
	2014	2014	2015	2016
Revenues	\$68	\$68	\$68	\$70
Expenses	\$58	\$61	\$64	\$70
Reserve Additions	\$10	\$7	\$4	\$0

\$ IN MILLIONS

DENTAL HEALTH PLAN

Plan activity for our dental self-insured plan is also recorded in the internal service fund. The financial plan anticipates annual premiums will cover overall costs with a small addition to reserves through 2016.

	ACTUAL	FINANCIAL PLAN		
	2014	2014	2015	2016
Revenues	\$4.5	\$4.6	\$4.9	\$4.9
Expenses	\$3.7	\$4.4	\$4.7	\$4.6
Reserve Additions	\$0.8	\$0.2	\$0.2	\$0.3
