Subject: Farmers know their land. Keep local control!

Why is a vote to give local control over to the Federal level being held in the middle of harvest!?

This affects the livelihoods of farms big and small! They deserve an opportunity to know what is going on and a chance to have a voice!

Postpone the vote and make sure these environmental groups seek local farmer input first!

Please do what You can as a committee to seek out and gain insights from those your vote will most affect!
