

Potential Operations Considerations for Minnesota River
Management Board
(what would/could it do/provide for?)

These are only first draft ideas

- A hearing communications setting and opportunity, to consider and identify basin specific systemic water management process changes needs. Subsequent policy change/modification considerations for recommendation to all accountable implementing state and/or local entities. A place to present high profile sets of circumstances as an example of what potential large scale actions need to be set in motion to affect a more desirable outcome.
- Coordination and up to date information sharing among all participants and provide for regular public outreach communications of all forms of public media.
- A potential for scale sized partnerships to accomplish basin-wide positive outcomes for multiple interests.
- The potential to collectively develop innovative basin-wide initiatives for needed major funding proposals.
- A chance for state agencies to show/report they can work together to accomplish a goal which has been a state focus of interest since 1988.
- A chance for innovations coming from the private sector to showcase outcomes related to water quality/quantity condition improvements.
- A place for the public to have truly relevant questions directed appropriately and answered.
